## AIR'PRO

### P3 half-mask

P702KCF

P3

133g

### APPLICATION

Protection P3 against highly-toxic particles and toxic solid and/or liquid aerosols: dusts from chromium, cobalt, lead, cadmium, hardwoods (oak, beech), asbestos (low concentration), silica, granite, ceramic fibres, legionella (short duration).

### BONUS

Filters out **99.95 %** of dust (average diameter **0.3 microns**).  
Compact (same size as a single-use mask), lightweight and comfortable.  
Unique patented filter technology: **improved breathing**.

### Main features

#### Materials:

- Mask: Medical grade TPE in compliance with ISO 10993-10: 2010 relative to irritation. Latex and silicone free, odourless mask body. Nylon valve, Inhalation/Exhalation silicone diaphragm. 4-point adjustable elastic head and neck strap with TPE pad for comfort.
- Filters: Mechanical HESPA-type synthetic filtering media with moulded TPE insert.

**Shelf life:** 5 years

Size	SKU number
M/L	<b>63 084 077</b>
S/M	<b>63 435 740</b> (not on stock)

### Description

- Compact, lightweight and comfortable P3 reusable half-mask
- Hugs the face
- **Exceptional breathing comfort:**
  - Patented pleated encapsulation technology for a larger filtration surface area
  - The synthetic HESPA® material uses mechanical filtration, giving greater comfort than electrostatic filtration used in disposable masks
  - Large central exhalation valve, highly effective for evacuating CO<sub>2</sub> and heat
- Compact design suitable for **glasses wearers**
- Filter service life: one week in extreme conditions
- **Significant economies of scale** and waste reduction compared with single-use masks
- Air'Pro P3 filtration superior to FFP3 disposable masks
- Supplied with integrated replaceable filters
- **A special carry case is also available for this mask (P702KCH)**

### Standards

- Half-mask in compliance with EN 140: 1998
- Filters in compliance with standard EN 143: 2000 + A1: 2006 P3 RD

### Packaging

- Single unit box
- Box of 10 masks
